## Construction Site Dustproof Net

Yantai Double Plastic Industry Co.,Ltd is a professional manufacturer and exporter of Construction Site Dustproof Net in China. we are committed to providing customers with professional products and services. We have always been adhering to the purpose of maximizing the interests of customers and providing customers with the most guaranteed services and optimized solutions.

### • Product Description

Dustproof Net, also known as covering soil net, is widely used in construction sites, road projects and other places. It is adaptable and cost-effective. The dustproof nets we produce are made of high-quality material- high-density PE, sprayed with plastic, and resistant to aging, which can effectively control the wind and reduce its dust-collecting function. It is not only suitable for covering soil on mountains, gravel factories, but also for sunshade in greenhouses.

Till now, our business partnership of Dustproof Net has covered more than 50 countries and areas.

Double Plastic® Construction site Dustproof Net is made of high-density polyethylene and made into a net shape through special woven process. It has strong tensile strength, aging resistance, corrosion resistance, radiation resistance. It is mainly aimed at avoidance of dust pollution as one of the main dust reduction solutions at present.

So, how to choose dustproof net that suits you?

1. Select the appropriate coverage and appropriate size according to actual needs.
2. The construction site dustproof net coverage net produced by regular manufacturers has clear regulations on packaging specifications, shading rate, specifications and dimensions.
3. The hand mold is flexible, elastic, not rigid, not rough, and has a flat space and a thick texture.
4. The construction site covering soil net of good quality has no peculiar smell and odor, only a slight smell of burning plastic.
5. The surface of Double Plastic® construction site dustproof net is flat and smooth, the flat wire is parallel to the gap, neat and uniform, the longitude and latitude are clear, the finish is good.
